KSM ZUND S3 L1200

Large variety of actually offered furniture makes it harder to get bigger and more repetitive orders. Today's profile of upholstery production needs reliable and fast cutting systems that allows to change models, their shape and amount easily and fastly. In order to meet your production requirements, the **KSM Zund** offers the ultrafast, single-ply cutter **S3 L1200**.

Below are presented main features of this system:

- dimensions of working surface **1800x1200[mm]** that allows to cut typical-sized rolls of materials,
- front extension **1800x1200 [mm]** that allows to collect cut elements during cutting another part of material,
- conveyor belt that make process of cutting elements that are longer than working surface possible,
- synchronized material feeder that controls speed, tension and position of material on cutting surface,
- Driven Rotary Tool **DRT** with decagonal, self-driven rotary knife; this solution guarantees full-speed cutting of material with maximum precision,
- Electric Oscillating Tool **EOT** dedicated to cut notches on material surface,
- unique, high-efficient algorithm **Autonest Textile** dedicated for creating nesting on rolled materials' surface; the results of nesting over 90% are possible,
- innovative and fully-configurable system based on projection and **SORTING MANAGER** plug-in that controls the process of collecting cut elements in right order,
- **CUT STATISTIC** module that generates statistics of employees' work, material consumption and summary efficiency of nesting,
- the most important: speed of cutting! Proper organization of work allows to get output of cutting up to 500 metres at 8 hours!
